

Getting into the Spirit of Creative Manifestation

Here are some pointers to get you started using your new *Visionary Tools for Creation!*

What I want

Start with a simple phrase in present tense, such as "I create..." "I intend..." or "I manifest..." and then fill in whatever you want. It can be a thing, a quality, a relationship... anything you desire! Include only as much detail as feels good to you; you can always add more later.

My reasons for creating this

Begin with "I create this because..." or something similar. Find your own phrasing, and keep it in present tense. You might find yourself writing something like "I choose this because I want to have more..." In other words, it's okay if the reason is something else you want. That's a powerful key to creating, uncovering the desire behind the desire.

How I'll feel when it shows up

This is the most important step. Pause for a moment, put your pen down, and really imagine how you would feel if you already had exactly what you've been writing about. Just let it come to you easily... let your energy expand to include the feeling of what you're wanting. Whatever comes up is perfect.

Once you have the flavor of it, start writing, beginning with "Now I feel..." Once you finish this step, you can read or speak the invocation at the bottom of the sheet if it feels good to you, or make up your own!

Action Steps

Now that you're really into the energy & feeling of having what you want, you might jot down a note about what action steps you feel inspired to take. Don't get too detailed, just let one or two things come to mind. You can use the blank box at the bottom of the sheet, or turn the page over and make some notes, or draw a picture, or doodle a bit. This is your blank canvas: already infused with the energy of what you're creating.
